Customer Review on Pumpkin 7 inch Android 5.1 Lollipop Car Radio Stereo for Opel Vauxhall

Arrived earlier than expected works great in my 2008 [Opel](#) Corsa easy to fit comes with all you need. No maps is the only

draw back add DAB and your set to go I also added a revers camera from one I had and it looks and works great now im the envy of my friends. great when parked up I can watch DVDs off my flash drive.

– by David Nolan

It is amazing what this [Pumpkin](#) car radio can do for the price and so far (2 months in) no major issues. At first I thought it was draining the car battery but it turned out to be a faulty car battery that was probably pushed over the edge by the extra power requirements of this device. A new battery sorted the issue and would probably have needed replacing soon anyway. I haven't managed to set the time correctly but I am now within an hour so am happy with that! The wi-fi receiver is a bit weak and I struggle to get a signal from our house but not really the device's fault. All other features are great – bluetooth links up seamlessly with phones, and sound quality is pretty good.

–by Mike

I have had this unit for over 2 weeks now installed in a 2011 Corsa. It was very easy to fit even though the wiring looks daunting at first. I am using the IGo Navigation app and it seems to work fine with the unit. Tried a few other navigation apps (HERE, CoPilot etc) but found they didn't quite work right. If I was to have a complaint about this product it would be that it doesn't work with my Ipod properly. When the wire is pushed in firmly I can't get any music at all but if the wire is loosely connected to the Ipod music is played fine. Does seem to be a problem alot of people have had as I have Googled it. Other than that Sat Nav, Bluetooth and other

features work good. I don't have a [reverse cam](#) attached.
