

Customer Review on Pumpkin 2GB RAM Android 5.1 Car GPS DVD Player 2 Din

[Pumpkin 2GB RAM Android 5.1 Car GPS Radio 2 Din](#)

This [Android 5.1](#) Car GPS Radio is just released on November. I bought it because this has more features than the previous [Pumpkin](#) car radio.

The radio is very well-finished and you can use all Android apps. What's interesting is the Android Auto 2.0 APP. This app IS designed for the car by Google and works very well on this radio (see photo).

The sound is very good, also the active subwoofer works good. All offline and online navigation software (TomTom, NAVIGON, Google maps) work very well and music or radio can be heard at the same time.

All offline and online navigation software (TomTom, NAVIGON, Google maps) work very well and can be heard at the same time music or radio.

I've tried out equipment several brands in (Sony/pioneer /...) and was never satisfied.

According to the warranty card, there are 18 months warranty.

For the very low price, you get a top new radio and a very good support (many new cars have still navigation without life traffic)

Features:

- +Fast Boot (Starts in about 2 seconds – see video)
- +Integrated 3G modem
- +Better Wi-Fi/3G antenna
- +2 GB Memory
- +Android 5.1
- +PlayStore
- +APK Installer
- +MicroSD and 3 USB ports (two rear and one front)

[Customer Review on Pumpkin 10.1 Inch Headrest Monitor Car DVD Player with HDMI Port](#)

On a quest to find a portable media player for my kids that I could use in my vehicle, I finally stumbled across this outstanding product. After purchasing 2 other portable media players, and both being defective, and having to be returned, I discovered the [Pumpkin, 10.1 inch digital media screen](#). The first thing that stood out was the brilliantly designed adapter bracket used to attach the media player to the headrest. Unlike the cheap straps that the other media players used, this design, included an adapter bracket, that easily snapped onto the headrest posts and did not obstruct the actual headrest for the front seat passenger or driver. The screen then easily attached to the adapter bracket, providing a clean look. I also liked how easily it could be removed and reattached to the bracket in event the screen needed to be taken out for any reason. It also allowed the ability to vertically tilt the screen for optimal viewing.

When I turned the media player on the first thing that stood out was the screen quality. Not only was the screen slightly larger (10.1 inches vs 9 inches or 7 inches) and flatter than

most other portable players, the resolution and visual quality was outstanding. I liked how quickly a dvd disc booted up as well. There was no long waiting for it to read the disc, nor did it have any trouble reading a disc. Also another great aspect to this player was despite visible vibrations when attached to my seat and driving down the road, the disc never skipped once.

Though I have not been able to experiment with all the features of this player, what stood out was the number of available options. After thorough research, I could not find a portable media player that included all the features that this one did. I won't list them all, but the features that this player included that stood out most to me, were the HDMI input, media card reader, the resume playback feature, and the remote control. Most players priced in this range exclude most of these features that I listed. Though not applicable to me at this time, this player included other great features like FM sound modulation, IR headphone support, AV ins and outs, and even included a video game disc with the remote doubling up as a controller!

In conclusion, I would rate the [Pumpkin](#) 10.1 inch portable [headrest monitor](#) media player five out of five stars. You simply will not find a better quality product, with more features, and in this price range. My only criticism of this product is that the unit's built in loudspeakers are not loud enough, even when the volume is maxed out. I only mention this because my child is too young to want to use headphones and rather than play the audio through my vehicles speakers, I like to listen to native audio sources in the front of my vehicle while my child is watching a movie in the back. Between my native audio signal and road and wind noise, the speakers on this player were not quite loud enough. That is a minor gripe that will change when my child is older and will

prefer to use headphones. Finally, this product is such an outstanding value, that I will be purchasing a second unit for my youngest child, once they are old enough to utilize it, in about a year.
