

Why You Should Go For An Android Stereo In Your Car

Driving without listening to any music is, well, not driving at all! It's just so boring driving from your home to work and back without bobbing your head to your favourite tunes. It's refreshing, motivating, and makes every journey a pleasant one. Car stereo technology has come a long way from what it was just a decade ago – and products today offer a multitude of features to make driving an amazing experience. It's safe to say that a modern, powerful, and feature-packed Android stereo system has become a necessity.

In light of this, here are 5 incredible reasons why you should get one installed today!

1. Listening to your Favourite Songs via Bluetooth Connectivity

An Android stereo system is based on the Android software itself – and you can have the system easily installed in your dashboard. If you're looking for something that gives you the best bang for your buck, then you should go for the [Universal Android 10 Touch Screen system](#), which has multiple capabilities. With streamlined Bluetooth connectivity, you can instantly connect your smartphone with the system and listen to your playlists. Moreover, you can also make and receive calls and texts with a tap on the screen – talk about a one-stop infotainment system!

2. Streamlined GPS Navigation Capability

While listening to music, an [Android 10 Double Din](#) car stereo also provides enhanced GPS navigation. While so many people use their smartphones for navigation, you can quickly enable the GPS feature on your stereo system and use a hands-free way to know where you're going. Sure, the system may just cost a bit more, but think about the added level of comfort and

convenience you're getting. Moreover, it's safer too – you'll be able to keep your eyes on the road. Plus, your GPS is also going to keep you up to date on traffic conditions, saving time and energy.

3. Quick Access to YouTube

Listening is to music not the only entertainment option you can enjoy. By installing an Android stereo system, you'd also be able to tune in to your favourite podcasts and watch videos by instantly connecting to YouTube. In addition, you can also browse the internet – think of it as a one-stop entertainment hub where you won't have to constantly use your smartphone. YouTube is pre-installed as an app in the [Android 10 Car Stereo 7" Double Din](#) system. Just open the app in your smartphone and connect to YouTube in your stereo system and enjoy next-level entertainment during a long drive – it's that simple.

4. Make and Receive Calls and Texts

Another really great advantage of installing a double din Android 10 music system is the fact that you'll have the option of making and receiving calls without ever having to pick up your phone. You can do the same for sending texts. The stereo comes built-in with a wireless android auto system that connects your smartphone with the stereo panel. The set up only takes a few seconds. After the set up is complete, the system will pair your phone via Bluetooth and save the setting. So, whenever you get in your car and start the stereo system, it'll automatically connect your phone, and you can start using multiple features hands-free. Every call and text you get will be displayed on the panel screen. It's something that you don't know you always needed. Plus, if your kids use your car, it can also act as a safety measure so that nobody in your family texts or calls and drive. Moreover, you can also mute your conversation by tapping on the screen and send customized replies such as "Busy Driving" or "Can't Talk" when you don't wish to take any calls.

5. Bigger and More Immersive Display

You'll be happy to know that the Android 10 double din universal series comes in different display sizes. There are three potential options you can choose from including a 7, 9, and 10" screen. It's really a matter of preference. For example, if you enjoy watching shows and movies during a long drive, you'd enjoy a bigger and more high resolution display such as the 10" Android stereo system. If you just listen to music and want to use other multimedia options, a 7" screen would suffice. Android music systems have some of the smoothest screens in car stereos. It's easy to maintain and will considerably enhance your car's interior.

Final Words

So, there you have it – all the best reasons to install an Android double din stereo system. From Bluetooth and GPS navigation to using YouTube and making calls, an all-in-one system to make your life even easier!

[Want to Watch Netflix in Your Car During Travel | Know These Steps](#)

Are you planning to go on a long drive and want to enjoy your travel? Nothing can be more fun than watching trending series or movies in your car. Netflix provides a wide range of streaming services and helps us stay connected with the television using thousands of devices through the internet. Enthusiasts can watch their favourite shows while travelling in the car. When we talk about watching Netflix, we don't mean say watching online shows on your phone, but on a wide screen in your car.

Though, there are several streaming devices that can help you watch Netflix content at anytime and anywhere, even while commuting. You can use any internet or data connected device that has the Netflix app including consoles, smart TVs, set-top boxes, car stereo's [head unit](#), tablets and smartphones.

In this guide, we've covered all the steps that can effortlessly make your Netflix app work in your car stereo.

Step No. 1: Connect a Car Stereo That is Mirror-Link Compatible

The first thing you require in a car multimedia is its mirror-like compatibility. With very little effort, you will be able to watch Netflix on the type of head units that can be mirrored. However, you will require a few cables and other connectivity devices. If you are a professional in linking devices, you will be able to activate Netflix hassle-free in your car. All you need to do is appropriate settings by mirroring your device with the [player](#).

Step No. 2: Mirror-Link Compatible Phone or Tablet Having Android 7 & 8

Secondly, you must have a phone or tablet that supports Mirror-linking. Your device must be Android 7 or 8. Such phones or devices are compatible to watch Netflix in the car.

With just a few more steps, you will be able to view your favourite television, movies, series and video content of your choice.

Step No. 3: App-Installed on Phone or Tablet Having an Active Netflix Account

The next step is installing the app on your phone or tablet. Once it is done, make a Netflix account and remain active on it until you are done watching your favourite shows. For this purpose, you require a device that can work the videos out. Usually, the car stereos have standard RCA input videos. They are in red, white, and yellow connectors. And you need to hook your phone and tablet to some connectors, depending on the device.

Step No. 4: Auto-Floating Apps

The auto-floating apps are for cars that come with all features so that they can be used in the vehicles through only phones. A standard app usually breaks the mirror-link connection or shows the app only on the phone's screen and not on the connected car radio or infotainment, but these floating

apps can make your lives easier while multi-tasting on your Android phone. When the app is on your phone, you will be able to connect to Netflix to watch content.

Step No. 5: Active Free-Form Type Mode & Mirror-Link Expert

Once installation of the required floating app is done, you need to activate the free-form style. Additionally, find the Mirror-Link professionals in case you face connectivity issues. Several subscribers of Netflix pay to get the contents and DVDs for this purpose. Netflix offers three different offers for its viewers, depending on the content's streaming quality. So, choose the one that seems most appropriate to you.

Step No. 6: Upgraded Mirror Drive Model

Upgrade your mirror drive model to prepare and watch your Netflix shows. There are several options to choose the drive model including Google, Chinese, LG, and other brands. Upon selecting the most appropriate one, you will be able to connect your tablet to the data connection by using the suitable app. This will help link with the Wi-Fi hotspot for Netflix. Stream your favourite show and enjoy your travel throughout.

Buy Double Din Car Stereo to Watch Netflix

A double din car stereo is packed with the latest technologies and includes classy upgrades for your car's audio system. Having exceptional audio and visuals, these double dins feature great navigation, communication, entertainment and much more. From Bluetooth connectivity, hands-free control, enhanced sound quality, to multiple media connections, a double din car stereo can make your rides more enjoyable.

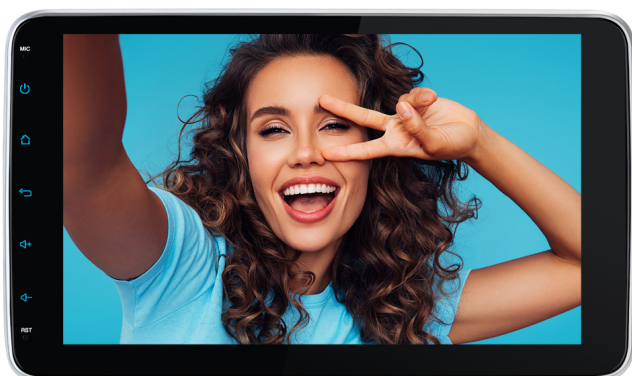

In addition to the double din, purchase from the widest range of [branded head units](#), [DVD players](#), to [car accessories](#) options. If you are planning your next road trip, follow the aforementioned steps and watch Netflix to ensure a pleasant journey.

Best Android Auto head unit for 2021 - Pumpkin

PUMPKIN CAR STEREO

PX30
10.1"

Install is easy as long as you have some level of electrical experience and can follow wiring schematics. Wires are all marked and was a very straightforward install.

Touchscreen is extremely responsive and processor seems to be pretty quick since I can transition screens with no lag.

<https://blog.autopumpkin.com/wp-content/uploads/2021/09/1.mp4>

Large user interface and screen that's very intuitive to navigate. Internal amp from stereo is just decent so don't expect the sound you would get from a name brand stereo. Get an external amp with subs if you're looking for quality sound. Although, the sound alone from the unit isn't bad. Just depends on how loud you want the stereo and I'm fine with the out of the box sound.

Tech support is easily accessed, they are knowledgeable and

quick to respond. Well beyond any company I've dealt with in the last 10 years. They have several YouTube videos posted showing how to use several features. Rarely am I impressed with or even recommend anything, but I am impressed and do recommend this car stereo.

Overall, the [android car stereo](#) is worth the money and a great bang for your buck!
