

Customer Review for Pumpkin LM-W0674 Toyota Universal 6.2 Inch 2 Din Bluetooth Head Unit

- **Shipping to the US was very fast** relative to the estimated time – ordered on 9/4/2015 and received on 9/8/2015. Purchased this for a 2005 **Toyota Camry** and it works great. The item ([LM-W0674](#)) **functions exactly as expected** and the **GPS (in Delaware)** appears to work very well. **Bluetooth pairs easily** with my phone and **operation of calls through the head unit is straightforward**. Additionally, the **wiring harness matches exactly** to my factory wiring, so it's simply **plug-and-play**. I purchased a Scosche Dash Kit to fill in the gaps because the item sits a bit further back and doesn't encompass the entire width of the stock stereo. **All in all, I'm very pleased with the purchase.**

- **Extremely happy with this purchase.** It **arrived much sooner** than expected and it **fits perfectly** in my 2001 **Toyota Rav 4** without a dash kit. It's set up to work

with Apple products, but it **works with my Android phone via Bluetooth** for music and phone calls. It was really easy to install – **plug and play indeed**. It comes with a remote and **the touch screen is bright and vivid and easy to navigate**. Haven't tried the GPS too much yet, but so far it **all works great**. Overall – a great product and I would definitely recommend it to anyone. Also a **great experience with the seller** – fast and courteous, answered my questions and the item arrived exactly as described with all the cords and necessary parts.

- The [head unit](#) was **well labeled** and the wiring harness fit my **Toyota FJ Cruiser** perfectly. This not being my first car audio install, I had an easy time installing it, even with having to drill 2 holes in the mounting case to accommodate the Toyota's mounting brackets. The biggest challenge was figuring out how to use the GPS which was simplified by downloading the instructions for the iGo-8 GPS software (included on a **4 GB micro SD card**) for free. **An adequate multimedia/ GPS receiver elevated to GREAT when factoring in the low price.**

Customer Review for

Pumpkin LM-W0675 Toyota
Corolla 8" Touch Screen
Double Din Bluetooth Car
Stereo

By **Thomas Penafiel**

Pros:

- Very sleek quality looking head unit. [This unit](#) fits perfectly into my 2010 Corolla and now it looks more modern. I can't describe how happy I am.
- Radio functionality is great. Plenty of preset slots for all of your favorite radio stations, and it will tell you the name of the song and who's singing it. Besides, the radio automatically shuts off when the phone rings.
- I purchased a backup camera to use with this and the screen shows a nice clear video feed. It was also very easy to install, and auto switched when I shift the car into reverse (you need to connect the reverse wire for this to work).
- Bluetooth audio quality is good and CD player is perfect!
- You can change the boot logo from "DVD" to your car's manufacturer.

Cons:

- GPS load time is about 15-20 seconds, which seems like a long time when comparing to a factory GPS.
- Sometimes callers have trouble hearing me over Bluetooth when they call.

Overall, I'm quite happy with my purchase. Both of the cons listed are very minor and do not change my overall opinion of this head unit. I'd recommend it to anyone looking for an economical upgrade to their Toyota Corolla. Nice work, [Pumpkin](#)!
