Couldn't be happier with this [Pumpkin](#) unit
After a few months of living with it I feel like I'm in a position to give a good review
Connectivity for this unit is good [android](#) iPhone all work well after you have configured your device
Bluetooth works well and all my steering wheel controls that I have configured work well
Sat navigation, using waze works well
Only thing I have yet to work out is how to remove widgets
grrrr apart from that buy one you can't go wrong.
