

# Customer Review for Pumpkin KD-C0713 Mazda 3 Android 4.4 Double Din 7" HD Touchscreen Car Stereo

By **Steve**

I installed [this stereo](#) in my 09 Mazda 3. I say “stereo” but it really is so much more. It’s more like an entertainment center for my car, because it has changed the whole feel of travel. Simply put, I love this!

## ▪ GPS

Great GPS included with accurate maps and still can use video outputs, so DVDs play to rear monitors for kiddos in the back seat.

## ▪ APP

All the apps I’ve tried work flawlessly and switching between them is very fast.

### ▪ Quality

Not much else I can say other than if you are debating on this unit, take my word for it, you will be very pleased with the build quality and ease of install.

### ▪ Audio

I should also mention the audio playback is well above stock [car stereo](#) sound and everything is crisp and clear.

### ▪ Customer Service

On a side note, I contacted the seller to ask a question about SD card playback and was pleased to get response almost immediately. It seems that customer service is top notch as well.

## [How to Disconnect the Mazda 3 Car Stereo Wiring Harness](#)

A bad car stereo wiring harness can prevent your [Mazda 3 car stereo](#) from working. When this happens you either need to pay a mechanic to replace it, or you need to replace it yourself. The first step is to disconnect it. For the novice who knows li

title about a car's wiring, this is a simple task that can easily be performed. Here's how:

### **Things you'll need:**

- Screwdriver
- Flashlight

### **Step 1 – Remove Your Dash Console**

To get a clear view of your car's panel, how the stereo is installed in your car, and where you'll find the wiring harness, remove the dash panel. Disconnect the stereo unit by removing any screws that connect the unit to your dash panel. Put the screws aside for use in replacing the stereo and panel. If the screws are stripped or corroded, replace them before continuing.

### **Step 2 – Disconnect the Wiring Harness**

Pull the stereo unit out from your dash panel. On the back side of the unit you'll see a number of wires connected. This is your wiring harness and will likely be clipped to the [Android car stereo](#). Unplug the wires from the harness. Finally, identify the wires that are coming from your speakers and are connected to the harness and disconnect them by pulling them loose from the harness.
