

Pricey But Good - Customer Review On Pumpkin BMW E46 Radio

Autoradio BMW Android 8.0

Although this [car radio](#) is very expensive ... Android 8 and the built-in hardware make for a lightning-fast start of the radio. I had previously installed the Business CD in my BMW e46 BJ 2000. That meant for me that I had to move the climate

control part. This is possible without additional mounting frame!

The music of the radio starts just as fast as my [bmw business CD](#), as soon as I start the engine. The sound is phenomenal compared to the factory radio. The EQ can be fine-granular adjust and the Loudness mode provides even at low volumes for sufficiently strong bass. The GPS antenna is in my glove compartment. It does not necessarily have to be placed on the Amarturen board. Google Maps is preinstalled by default. I mainly use the offline maps. Additionally, I have installed Spotify from the AppStore. This app is also great and does what it should.

This [bmw e46 radio](#) actually holds all the promises given in the description.

The lighting of the buttons can also be adapted to all sorts of colors.

Pumpkin LM-W0674 Toyota Universal 6.2 Inch 2 Din Bluetooth Head Unit

- **Shipping to the US was very fast** relative to the estimated time – ordered on 9/4/2015 and received on 9/8/2015. Purchased this for a 2005 **Toyota Camry** and it works great. The item ([LM-W0674](#)) **functions exactly as expected** and the **GPS (in Delaware)** appears to work very well. **Bluetooth pairs easily** with my phone and **operation of calls through the head unit is straightforward**. Additionally, the **wiring harness matches exactly** to my factory wiring, so it's simply **plug-and-play**. I purchased a Scosche Dash Kit to fill in the gaps because the item sits a bit further back and doesn't encompass the entire width of the stock stereo. **All in all, I'm very pleased with the purchase.**

-- By **AA**

- **Extremely happy with this purchase.** It **arrived much sooner** than expected and it **fits perfectly** in my 2001 **Toyota Rav 4** without a dash kit. It's set up to work with Apple products, but it **works with my Android phone via Bluetooth** for music and phone calls. It was really

easy to install – **plug and play indeed**. It comes with a remote and **the touch screen is bright and vivid and easy to navigate**. Haven't tried the GPS too much yet, but so far it **all works great**. Overall – a great product and I would definitely recommend it to anyone. Also a **great experience with the seller** – fast and courteous, answered my questions and the item arrived exactly as described with all the cords and necessary parts.

-- By **Britney**

- The [head unit](#) was **well labeled** and the wiring harness fit my **Toyota FJ Cruiser** perfectly. This not being my first car audio install, I had an easy time installing it, even with having to drill 2 holes in the mounting case to accommodate the Toyota's mounting brackets. The biggest challenge was figuring out how to use the GPS which was simplified by downloading the instructions for the iGo-8 GPS software (included on a **4 GB micro SD card**) for free. **An adequate multimedia/ GPS receiver elevated to GREAT when factoring in the low price.**

**[Customer Review for
Pumpkin KD - C1107 BMW E46](#)**

Series 7 Inch 1 Din Android 4.4 Head Unit

I had never heard of [this unit](#) before and found it on a random search through Amazon. I figured for the price and it was worth a shot, since the Dynavin is still a good bit more expensive... I am very impressed by it!

▪ Installation

Installation was silly easy, I got it done in a couple of hours and that was because I wanted to hide wires for the GPS antenna and Bluetooth microphone. If you're less picky than me, you could get it done in a half hour.

▪ Screen, buttons and knobs

The buttons and knobs are very well built, the finish is slightly more glossy than the stock business radio of the E46, though I suspect part of that is due to aging of the stock materials. The screen is bright and clear and **the touchscreen is very responsive**, the colors and sharpness are great.

▪ Audio quality

I was worried that the audio quality would be worse than the stock CD player, but it's definitely not when using equal mediums (CDs, iPod, radio, etc). But when streaming Bluetooth, it's not the best. Most people probably wouldn't notice the difference (my friends didn't), but if you're like me and like clear audio, you'll want to stick to CDs, SD cards or an iPod.

▪ **GPS navigation system**

I love the navigation which **displays the speed limit of the road you're on** as well as warning you if you're speeding. **It can also display any nearby gas stations, hotels and many other things** and lets you choose which one you can see or not see.

▪ **App installation**

The unit **comes with a .apk installer app** so that you can install any app from the Google Play Store from an SD card, or anywhere else you could find a .apk app. It also **has the Google Play Store app installed** on it, so if you use your phone as a mobile hotspot for the on-board WiFi or use a 3G data card in your unit, **you can download apps directly from the store**. The included apps are pretty good. My only gripe with the pre-installed music player is that there is no shuffle button, that seems like a huge oversight, otherwise it works well and the equalizer presets are pretty good, as in the custom mapping option that it gives you.

▪ **Conclusion**

All in all, **I'm very happy with this unit and would highly recommend it to anyone**. It's made the interior of my E46 feel much more updated and new. In fact, my girlfriend just bought a new Ford with the "My Ford Touch" option and she agrees that the nav screen in my E46 is better.
