

# Why do people still buy a portable Blu-ray DVD player?

## **Light and portable:**

If you want to experience HD picture quality anytime, anywhere, a portable Blu-ray player is the ideal choice. Since the portable Blu-ray player is powered by an integrated battery, it can be used almost anywhere. The playing time of the device is on average between 3 and 5 hours. If an outlet is available, it can usually be powered from the power cord.

## **Comprehensive functions:**

In addition to Blu-ray discs, portable Blu-ray players can also play DVDs and CDs. Many portable DVD players also have USB interfaces and SD card interfaces. Depending on the range of functions, the portable Blu-ray player can also play video, audio and image formats. For home use, the device can also be connected to the TV via a cable.

## **High usability:**

The screen size of the portable DVD players in [Pumpkin](#) is between 10.1 and 14 inches and some can be swiveled and rotated. Therefore, you can always optimally adjust the viewing angle. There is also a headrest stand for Blu-ray players, which significantly improves the comfort of the automotive film experience. An adapter that is charged via a cigarette lighter is particularly practical.

## Conclusion:

At this point, you now know what to look for when buying a portable Blu-ray player. You know all the important points and can adapt them to your wish list. Before you decide on the best Blu-ray player for on the go, you should definitely have a look at our 12 inches and 14 inches Blu Ray DVD players. You may have found a suitable Blu-ray player here. Regardless, portable Blu-ray players are useful playback media for traveling movies, videos, photos and music. However, if there are only one TV and different film requirements, it can also work at home. Portable Blu-ray players have an advantage in this regard since connecting headphones doesn't bother others. You can also connect a Blu-ray player to your TV and use it for your home theater. As you can see, a portable Blu Ray player offers you a variety of entertainment options, which is why the purchase will definitely be worthwhile for you!

# How to choose a Portable DVD Player

Road-tripping parents who'd rather not hear the four dreaded words "Are we there yet?" from the back of the car. A portable DVD player can go a long way in alleviating the more mundane aspects of being out and about.

Films are a fantastic way to escape while on a trip, as you can easily invest in a story that will make time go by faster. We have countless DVDs of both movies and TV shows at home that we want to watch while on our trip. This is why buying a portable DVD player is a great idea for the entire family to enjoy.

If you have kids, this is a great way to keep them occupied and calm while on a lengthy trip. If you are traveling to a location without a television set, it is also a great way to end the night while watching one of your favorite films or shows. Here we are talking about some tips about choosing a [portable DVD player](#).

## **Dimensions of Compatibility**

Determine the size of the DVD player according to the place that you will always use the player. If you want the former, pick a laptop-style portable DVD player that would rest comfortably on your... well, lap. If your goal is a portable DVD player that serves as a car player, think about getting one designed for vehicular use. If so, you can go with one of the bulkier ones with a bigger screen and enjoy the larger, face-shielding viewing experience that comes with it.

## **Portability**

"What if I fly a lot?" That you may consider a portable DVD player. Not only does weight easily add up when you're cramming stuff into your carry on, but you also don't want to be fiddling around with a honking-huge player when you're taking off your shoes and emptying your pockets as other passengers give you the evil stare while going through airport security. For some of us, portable just works better for everything in our lives.

## **Region Locking**

"Why can I play some DVDs, but not others?" Film studios use regional code protection in DVD technology to protect content and to control worldwide release dates, So the DVD player will only play the media that matches the region code of that player. All other media with other region codes won't play at all. So you need to choose the right DVD player that can match your region code.

## **Battery Terms**

Most of the DVD players can play over 4h and charge for 6h. You can pay attention to the specification about the payback time before you place an order.
