

Surprisingly good unit for my Ford

Android 10

RAM:4GB ROM:64GB

PUMPKIN CAR STEREO

I installed this [Android 10 Head Unit 7" Double Din head unit](#) in a 2005 Ford Ranger. The install wasn't bad but I did have to cut out more of my dash. I had previously cut out some for the deck that was in here before. Not a big deal but worth noting. That could be just because my truck is old too. Hahaha.

As for the unit itself, everything is great. It's very responsive. I've seen some reviews of people saying they're responsive but the video suggests otherwise. This one is very snappy with that new p6 CPU.

AM/FM works great. I use Spotify premium and download my music so I always have it. That also works flawlessly so far. I've also downloaded a large area around me in Google maps, though I do usually use my phone as a Hotspot.

Torque connects quickly and works well with my obd2 connection. I do see there is a review talking about this not working. It's possible I just happen to have the right type of OBD2 connector. I know there are some that say they may not work with Android head units.

I also ran all 3 USB connections out under my dash. It does run my charger and my dashcam with no issues.

So far, after about a week I'm VERY happy with my purchase. I was worried as there was only one review in here at the time with no written reviews.

Now for the bad stuff.

There isn't really anything bad, just different.

My biggest complaint/wish is that the music controls could be kept on the screen always. If I have torque up, I have to switch apps back to Spotify or the radio to change anything. With Google maps and Waze, they do have a Spotify interface which helps a bit.

My other gripe is that you can't seem to adjust the widgets on the home page. It has the clock and radio controls which are nice but I can't move them or even put the Spotify widget on the unit. It's not a huge deal and it just takes a minute to get used to.

Overall, I would absolutely buy this again. I'd recommend this to anyone who is looking for an android deck.

Good item and great customer service

PUMPKIN CAR STEREO

This is a review of a cheap [Pumpkin head unit](#) with some nicer features like GPS and a decent amount of memory. The unit seems responsive and fast. The screen is not the brightest out of the box and has no obvious knobs to adjust it but if you go into settings (admittedly quite buried in the menus) then you can get brightness and contrast to be OK for daily driving. The sound output is great for my system (I only have two channels) but not sure it would be great for surround. Everything about this unit is cheap but not cheap. Actually, you do not need a manual – all the pinouts are available in the settings once you power on the unit. The wires are all

labeled well (like speaker wires have labels) and the wires on my unit follow standard codes so, for example, my sound was good the first time I hooked everything up. Best of all, when I made a mistake and failed to properly hook up the reverse wire, their tech support spent two days with me by email helping me troubleshoot. It was slow but I have to admire the commitment to the customer.

I just installed the unit so I have no idea if the screen will last or anything to do with longevity. I also think that if you have a few hundred dollars extra and don't want the installation hassle then maybe buy a brand name and have the dealer install it. If money matters though, then this unit is an impressive bargain for the money.

[Pumpkin Single Din Android 10 Head Unit Review](#)

10.1 inch single din Quad-core Android 10 car stereo with 2gb ram and 16gb rom, which can supports multiple functions, like USB, SD, WIFI ,Mirrorlink, DAB ,OBD2, Carplay, Android Auto,Reverse Camera etc. With high-definition Adjustable screen, the angles design make screen can be freely rotated to effectively avoid screen glare.
