

Amazing head unit for the price wow awesome !

Android 10 PUMPKIN CAR DVD STEREO

I replaced my blown out head unit on my 2006 Volkswagen Jetta which was an aftermarket [Pumpkin](#) product with this [7 inch double din head unit](#). First of all, the cost is amazing. I didn't know much about this brand of electronics, but I did some research and read the reviews. I decided to purchase it and I was glad that I did this unit is fantastic. The graphics and the simplicity of usage is awesome and the install was fairly easy. I had his head unit installed by a professional installer, the geek squad at Best Buy along with a sub woofer an alpine power amplifier, and this unit sounds so nice. The DVD that you play back on this is awesome. The graphics though the resolution amazing. I would definitely buy it again and I would highly recommend it to all my friends and family. I have gotten a lot of complements not only on the head unit but the sound quality it is a powerful head unit with lots of power to spare. And especially with the amplifier and sub woofer well, what more can I say amazing great price.

Great radio- gives a different look for my car

[Great car stereo](#) transformed my 2009 Honda Fit into 2020. Latest Android 10 is key and installation was easy. Highly recommend. The level of customization one has with tons of

apps compared to other more expensive brands that have limited connectivity makes this a worth buy for 2020 and beyond. Great customer service as well.

The screen is vibrant with minimum reflection, installed Sygic maps that are direct and are turn by turn real time, I can hot spot phone and get real time updates. The [head unit](#) is super versatile and astatically gorgeous. I had a small user error and support was supportive communicative and awesome!! love the company and product. Installed in my cts coupe as a floating display...

Everything worked as advertised. This monitor is huge which makes YouTube videos pop! I recommend this to anybody who wants a solid android system!
