

Good replacement head unit

Unit arrived on time and very easy to fit into VW 2014 T5.1 making a perfect fit. Wiring very easy especially if you have ever fitted head unit previously. If you have any uncertainty of installation, you can contact the Pumpkin tech support. All accessories connected easily, rear camera, WiFi, GPS, microphone. Bluetooth to phone and contacts are great etc. Small tech issue with door open display which easily corrected with quick email to tech support and changes made in settings. Excellent head unit.

Presently surprised, with product and customer support

Android10

PUMPKIN CAR DVD STEREO
Built in DAB

RAM
4GB

ROM
64GB

I decided to reach out to onlinestore@autopumpkin.com to clarify a few potential issues before purchasing, they were able to answer all my questions pre-purchase so I decided to give it a go.

I was happily surprised with user interface, functionality and build quality.

Onboard Google maps is great however it requires a wifi connection from my phone which isn't a problem as phone is in a wireless charging cradle.

Spotify works nicely via bluetooth music however I could just download the app if I wanted full functionality.

Canbus interface is great too as when I reverse the steering wheel interacts with the guidelines so now I've ordered a reversing camera, ignition stays on until I remove the key fully and display shows what door is open (when I first fitted the product the doors were opposite but customer support guided me through what settings needed changing).

All in all it has turned out to exceed expectations as too has customer support both before and after purchase.

The only problem I encountered with this was the antenna

connection, it is a twin unit with both antenna on the one connection, it was easy for me to disassemble one of these and fit another single adaptor as I had one handy, I let support know about this so if your factory unit has 2 separate antenna connections maybe reach out to see if they have a plug and play remedy available by the time you go to buy.

Amazing head unit for the price wow awesome !

Android 10 PUMPKIN CAR DVD STEREO

I replaced my blown out head unit on my 2006 Volkswagen Jetta which was an aftermarket [Pumpkin](#) product with this [7 inch double din head unit](#). First of all, the cost is amazing. I didn't know much about this brand of electronics, but I did some research and read the reviews. I decided to purchase it and I was glad that I did this unit is fantastic. The graphics and the simplicity of usage is awesome and the install was

fairly easy. I had his head unit installed by a professional installer, the geek squad at Best Buy along with a sub woofer an alpine power amplifier, and this unit sounds so nice. The DVD that you play back on this is awesome. The graphics though the resolution amazing. I would definitely buy it again and I would highly recommend it to all my friends and family. I have gotten a lot of complements not only on the head unit but the sound quality it is a powerful head unit with lots of power to spare. And especially with the amplifier and sub woofer well, what more can I say amazing great price.
