

How to soldering your head unit if your stereo have not external microphone input? Like JY-C0227U

Recently, Tyson said I haven't tried an external microphone. How would I attach one? The unit doesn't look like it has an external microphone input.

So, How to solve it?

You need to do this.

This adapter and external Mic, I will send it to you.

So you need to cut the adapter wire and soldering it like this images
