

Customer review on 7" Android

9.0 Car Stereo Radio for Opel

I bought this unit for an old vehicle: Zafira B. I did have some issues fitting it, but customer services were fast to respond. It turns out that I needed to remove a bracket at first, which was causing issues.

The unit has operated well, a week in, and although I have not connected everything (DAB+ unit) it was a bit awkward to get it all in. I guess I could remove some dash to fiddle easier, but time is fairly premium at the moment.

Being able to play my Spotify through this unit is excellent. You can download your music library using the Wi-fi outside your home and it downloads quickly. Adding My google account to the car and being able to check email, my calendar, and even watch Youtube through it is great. The head unit is fairly responsive and like I say the sound quality is really good, A lot better than the standard head unit. Using My phones Mobile WI-FI Hot spot takes this unit to another level. Connected to Bluetooth I can make and receive calls and what makes it a great is the combination of the Android operating system which runs all applications well. I am very happy with the Unit and the customer support I have received.

Great customer service though!
