

Why You Should Go For An Android Stereo In Your Car

Driving without listening to any music is, well, not driving at all! It's just so boring driving from your home to work and back without bobbing your head to your favourite tunes. It's refreshing, motivating, and makes every journey a pleasant one. Car stereo technology has come a long way from what it was just a decade ago – and products today offer a multitude of features to make driving an amazing experience. It's safe to say that a modern, powerful, and feature-packed Android stereo system has become a necessity.

In light of this, here are 5 incredible reasons why you should get one installed today!

1. Listening to your Favourite Songs via Bluetooth Connectivity

An Android stereo system is based on the Android software itself – and you can have the system easily installed in your dashboard. If you're looking for something that gives you the best bang for your buck, then you should go for the [Universal Android 10 Touch Screen system](#), which has multiple capabilities. With streamlined Bluetooth connectivity, you can instantly connect your smartphone with the system and listen to your playlists. Moreover, you can also make and receive calls and texts with a tap on the screen – talk about a one-stop infotainment system!

2. Streamlined GPS Navigation Capability

While listening to music, an [Android 10 Double Din](#) car stereo also provides enhanced GPS navigation. While so many people use their smartphones for navigation, you can quickly enable the GPS feature on your stereo system and use a hands-free way to know where you're going. Sure, the system may just cost a bit more, but think about the added level of comfort and

convenience you're getting. Moreover, it's safer too – you'll be able to keep your eyes on the road. Plus, your GPS is also going to keep you up to date on traffic conditions, saving time and energy.

3. Quick Access to YouTube

Listening to music is not the only entertainment option you can enjoy. By installing an Android stereo system, you'd also be able to tune in to your favourite podcasts and watch videos by instantly connecting to YouTube. In addition, you can also browse the internet – think of it as a one-stop entertainment hub where you won't have to constantly use your smartphone. YouTube is pre-installed as an app in the [Android 10 Car Stereo 7" Double Din](#) system. Just open the app in your smartphone and connect to YouTube in your stereo system and enjoy next-level entertainment during a long drive – it's that simple.

4. Make and Receive Calls and Texts

Another really great advantage of installing a double din Android 10 music system is the fact that you'll have the option of making and receiving calls without ever having to pick up your phone. You can do the same for sending texts. The stereo comes built-in with a wireless android auto system that connects your smartphone with the stereo panel. The set up only takes a few seconds. After the set up is complete, the system will pair your phone via Bluetooth and save the setting. So, whenever you get in your car and start the stereo system, it'll automatically connect your phone, and you can start using multiple features hands-free. Every call and text you get will be displayed on the panel screen. It's something that you don't know you always needed. Plus, if your kids use your car, it can also act as a safety measure so that nobody in your family texts or calls and drive. Moreover, you can also mute your conversation by tapping on the screen and send customized replies such as "Busy Driving" or "Can't Talk" when you don't wish to take any calls.

5. Bigger and More Immersive Display

You'll be happy to know that the Android 10 double din universal series comes in different display sizes. There are three potential options you can choose from including a 7, 9, and 10" screen. It's really a matter of preference. For example, if you enjoy watching shows and movies during a long drive, you'd enjoy a bigger and more high resolution display such as the 10" Android stereo system. If you just listen to music and want to use other multimedia options, a 7" screen would suffice. Android music systems have some of the smoothest screens in car stereos. It's easy to maintain and will considerably enhance your car's interior.

Final Words

So, there you have it – all the best reasons to install an Android double din stereo system. From Bluetooth and GPS navigation to using YouTube and making calls, an all-in-one system to make your life even easier!
