CAUTION

Internet Connection

WiFi Connecting

Click the Setting icon and enter the Wi-Fi setup, drag the “OFF” icon to turn on the wireless network, and all available wireless networks will then appear, then click your wireless network for connection. In case the wireless network requires no password, click on the “Connect” and begin to connect; if the wireless network requires a password, please enter a password first, and then click “Connect” to start the connection. If the wireless network has been successfully connected before, the information will then be stored and will automatically connect. After the successful connection of machine, the status bar at the top of screen will show a wireless network icon 

3G Connecting(Optional)

The machine support 3G internet, but you need to buy USB WCDMA 3G dongle and WCDMA Internet SIM card to make this function work. The machine can only support our special WCDMA 3G dongle to work at the moment, welcome contact us to purchase it if required.

First, insert a WCDMA internet SIM card, 3G bandwidth only, not

support 4G, into the 3G dongle. And then you plug the 3G dongle to the 3G/USB port at the rear of the device. Then turn on the power and wait for around 30 seconds, until it shows the signal icon  and shows get acquisition.

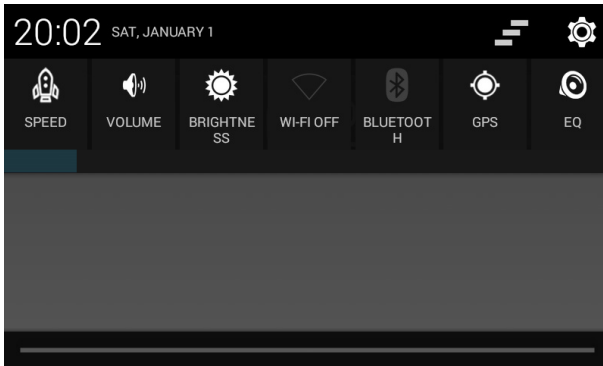

Portable Hotspot

When 3G network connection is OK, open the “Portable WiFi hotspot” and you can set the network SSID, security and password in “Set Wi-Fi hotspot”, and save it after setting completion. Other wireless devices also can connect to the network via machine’s Wi-Fi hotspot at this time.

Main Interface

With the Capacitance Sensitive Touchscreen, you can easily touch and drag to operate. In the main interface, you may touch the icon  to view all applications. Click on the icon of any application and keep about 3 seconds, then you can drag the application icon to the main screen interface as shortcut icon.

- ❖ When playing the music and press Home key to return to the homepage, the weather widget will become the music player controller.
- ❖ When playing radio and press Home key to return to the homepage, the widget will become the radio controller for radio station switch.
- ❖ When playing Bluetooth music function and press Home key to return to the homepage, the widget will become the Bluetooth music play controller.

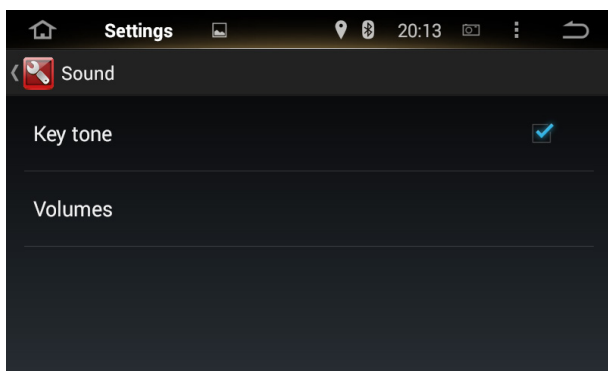

System Setting

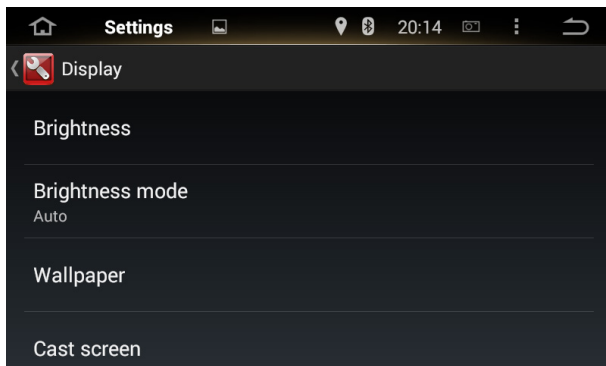

Sound

This is for whole device's volume output setting, in this menu, you can also use tick to select or cancel the keypad beep tones.

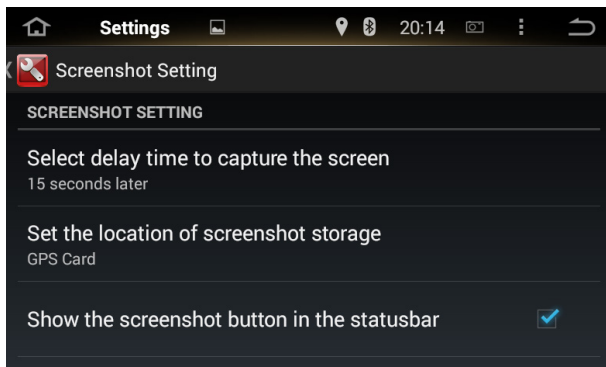

Display

- ❖ Brightness of LCD screen brightness adjust.
- ❖ Wallpaper for background picture of the homepage, you can choose system preload pictures or even setup your own photos as the background picture of the homepage.
- ❖ Cast screen function is not available at the moment on the device.
- ❖ Screen recorder is for the screen all activities function record, if you have any operation question or error, you can easily record it and store in the SD card, and then send it to us online for checking without taking your own record device to record.

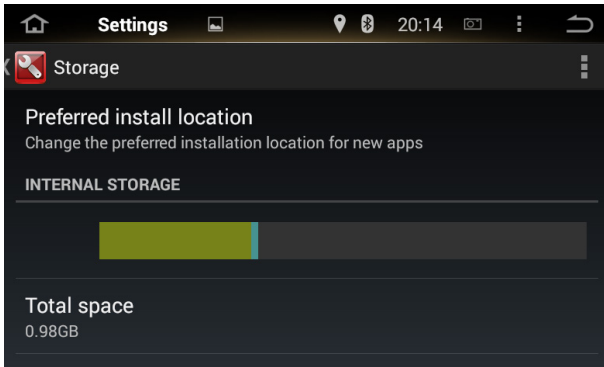

Screenshot Setting

Set the screenshot image storage location(GPS/SD/USB), select the delay time to capture the screen, then switch to the desired captured interface, and the image will then be automatically captured after the countdown time finished.

Storage

To see the available storage space, you may format the internal memory, and select the option of media scan to an external memory card or an external USB device.

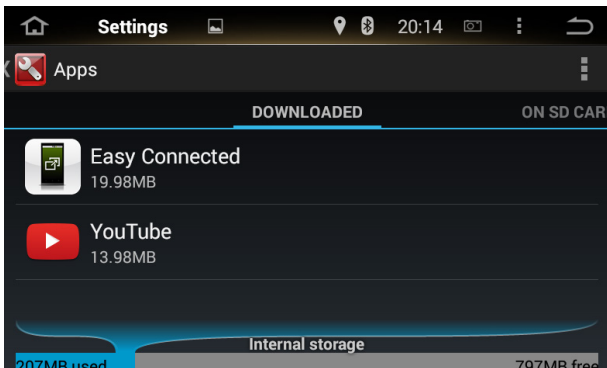

1, “Preferred install location” can be set either on a SD card or inside the device memory just based on your software that you have installed.

2, If you want to remove TF card or USB flash drive, click on the option “Uninstall TF card” and confirm your selection, then you’re allowed to remove the TF card/USB host device in a safe manner. Of course you can remove and unplug your device directly without doing this.

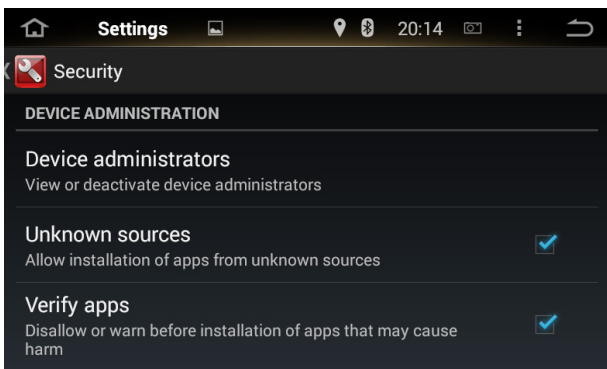

Apps

Click the catalog (already downloaded, SD card, under running or all), and select the application you want to uninstall, you will then enter the following interface, click “Uninstall”, and then you can remove the application from the system. Please note that some preloaded system apps are not allowed to remove.

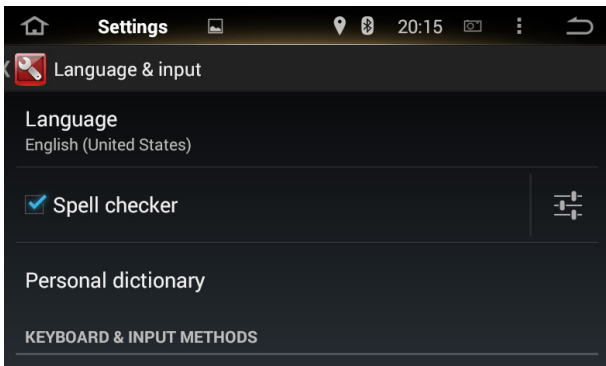

Security

Display the password, device manager, unknown source, trust certificates, and installation from SD card.

Language&input method

Available for system language selection, text input and auto-error correction options. Select your favorite keyboard and input method, and set the text-to-language output, pointer speed.

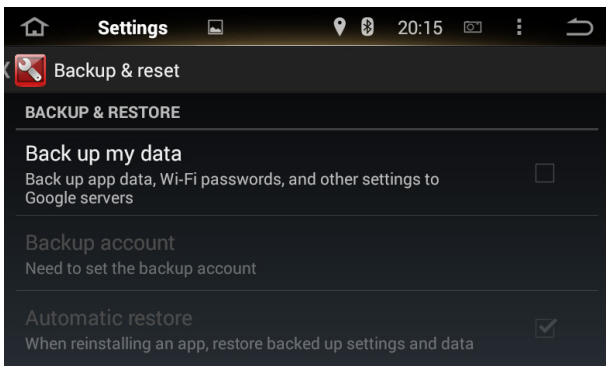

Backup & Reset

Available for data backup or reset, and the factory settings restore. If you have any problem on the system, you can restore the data to solve it.

Warning:

Once you perform a “restore factory settings”, it will erase all personal data and apps on the machine, so you are required to make backup for all your personal data before executing this function.

Date & time

You may use the GPS to automatically update the time or just use the time or time zone provided by the networks. You can also

manually set the date and time, select the time zone, and choose the display format of the time and date.

Driving settings

Video settings, media settings, reversing X-mirror, reversing sound.

Driving settings

Video settings, media settings, reversing X-mirror, reversing sound.

Tips:

12, Delete all history

Bluetooth Music Menu

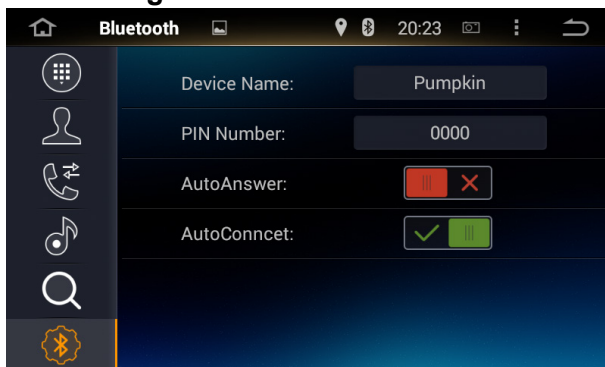

In this menu, you can control the music player original built in your phone system, and make the sound come out from the car speakers via the Bluetooth Audio stream transfer.

Note:

It does not support to display song name or listing from the phone, only can control switch or stop of the song. It can not transfer files in Bluetooth function too, only for Audio stream transfer.

Bluetooth Setting Menu

In this menu, you can modify the Device Name, pair pin number. Automatic pairing with phone is defaulted. When the system displays the successful pairing is done, the phone starts to connect with the connection password of “0000”, and the Bluetooth function is available when the system prompts the successful connection (Bluetooth symbol in the upper right corner of the screen changes from gray to white).

Note:

For detailed operation of phones, please refer to the operating instructions section of the Bluetooth in such mobile phone

GPS Function

The machine has preloaded free copy map software in the map SD card, which was inserted to the GPS card slot. And we have preinstalled app into the system, you can directly press the Navi/

GPS button to enter into it. As it is free copy map, it doesn't support update via internet directly, but you can feel free to contact us for new map software in the future when we have it. If you want to use your own map software that you installed, please go to setting----GPS----GPS application options to select the navigation software you intend to use.

Note: For those countries we don't have map file, an empty micro SD card will be enclosed only.

GPS sound mode selection: “Switch” and “Mix” option.
Switch mode will mute all other function sound when GPS give guidance sound.

Mix mode will reduce all other function sound when GPS give guidance sound.

GPS mix ratio: adjust the mix ratio of the size, you can map the voice increases.

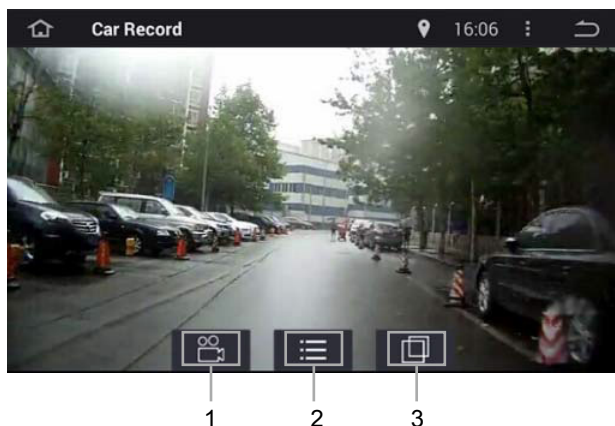

Car Record Function(optional)

After connecting the free driver USB camera, click the car record app to enter into the function. As the videos recorded by the driving recorder is stored in the GPS card, so please make sure

you inserted storage card in GPS card slot. And the video files are large, it is recommended to use the map card above 8GB, so the driving video time automatically saved will be longer.

Note:

The function requires a free driver USB camera to be connected to the 3G/USB port, if you demand that, welcome to contact us for purchasing. If the camera is not working, please go to setting----factory setting----input password 121212 to check if the front camera has ticked.

- 1, Start recording. Background operation can be carried out after The starting of the recording, and the recording will be automatically saved after stopping the video recording.
- 2, List of recorded videos. The left space of playback and video recording interface will show the time, longitude, latitude and driving speed.
- 3, Switching of videos between multiple cameras(The machine only support one camera recording at the moment, do not support multiple ones)

Reversing Camera Function

The machine originally support reverse camera display function,

you just need to buy a reverse camera to install it. If you demand, welcome to contact us for purchasing one, as our camera is special with trigger wire for automatically switch when reversing car.

If you have camera with trigger wire, you connect yellow connector with CAMERA IN cable from the device, connect trigger wire with REVERSE wire from the ISO cable harness.

If the camera does not have trigger wire, you need to extend the REVERSE-IN wire from the ISO cable harness, connect it to the positive pole of the car reverse lamp of the car.
